Automated and robot welding torches for mechanised and automated applications

For automated production: our automated welding torches can be adjusted to each application on an individual basis. Combined with the EWM welding processes, you will be able to work not only flexibly, but also efficiently.

You can find detailed information on our robot welding torches in our automation catalogue.

Overview of EWM's MIG/MAG welding torch program

EWM's MIG/MAG welding torches equip you for any job, while also saving time and therefore money. The high-quality materials used in the consumables makes them highly durable and ensures a stable welding process.

The portfolio is completed by a vast array of consumables which allow you to take on any task.

Professional welding torches from the PM series

Highlights

- Professional welding torch with flexible ball joint
- Can be ordered as a function torch with remote-control function and graphic display.
- Can be ordered with LED lighting for illuminating components.
- Full Xnet support Xnet 2.0 ready
- Wide range of options allows customisation in line with individual requirements.
- Ball joint ensures comfortable operation in frequently changing welding positions and positional welding.
- Thanks to X technology, function torches no longer require an annoying additional control cable.
- PM and MT torches ensure huge cost-saving potential with EWM consumables.
- Gas nozzles in conical, cylindrical and bottleneck shapes are available for narrow gap welding with PM and MT torches.

Welding torch design

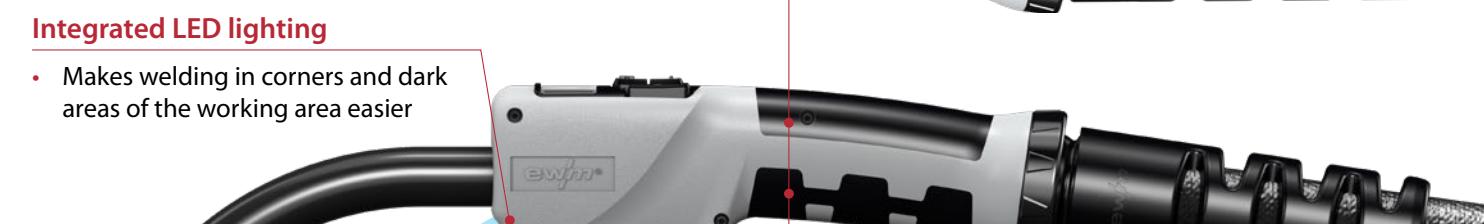

Torch neck rotatable through 360°

- Ultimate flexibility with replaceable torch necks

Compact ball joint provides optimal range of movement

- Comfortable working conditions thanks to strain relief, especially for positional welding

Integrated LED lighting

- Makes welding in corners and dark areas of the working area easier

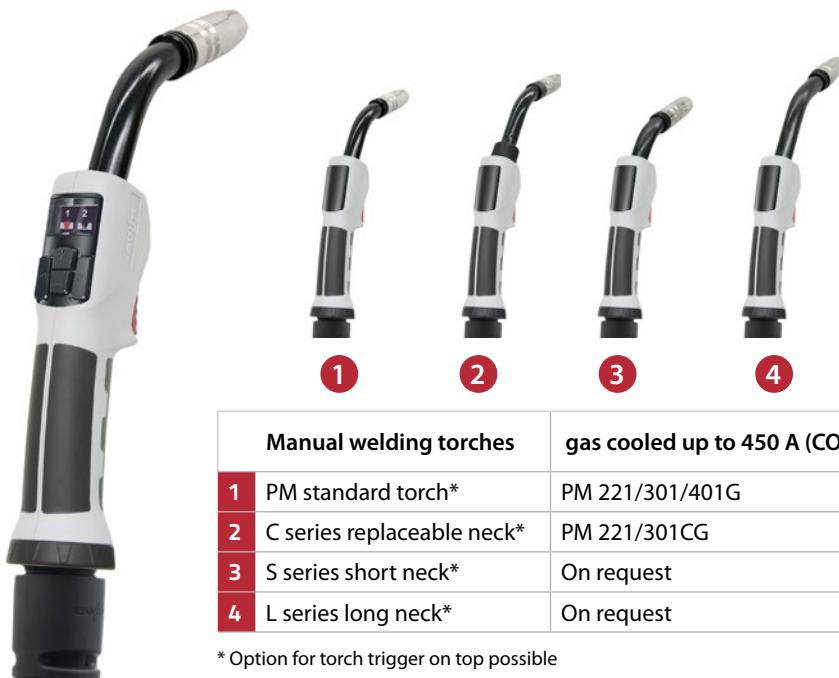

Torch trigger protection – prevents misfiring

- High level of safety – no switch-on caused by unintentional operation
- Protects against damage to the workpiece

Rubber inserts in the grip – for the best hold

- High degree of welding comfort thanks to ergonomically shaped handle
- Secure hold for optimum welding torch guidance, even during positional welding

Professional welding torches from the PM series:

PM CG/CW

- Replaceable torch necks with various bend angles
- Excellent handling even in hard-to-access areas
- Torch neck can be continuously rotated through 360° and locked in any position

PM long neck torch

- Longer torch neck for hard-to-access operating points and high duty cycles
- Available in versions PM 451 WL and PM 551 WL

PM short neck torch

- Shorter torch neck for especially tight operating points
- More practical and lightweight than standard torches
- Best suited for applications within confined spaces
- Available in versions PM 451 WL and PM 551 WL

PM 551 W Alu welding torch

PM 551 W Alu

- MIG/MAG welding torches

PM 551 W 2U/D X Alu

- MIG/MAG function torch, water cooled, X technology

PM 551 W RD3 X Alu

- MIG/MAG function torch with OLED graphic display, water cooled, X technology

Immediately ready for use in aluminium welding

PM-Alu welding torches make MIG aluminium welding that bit easier.

The PM 551 W Alu welding torch guarantees perfect, consistent results when welding aluminium.

The welding torches are supplied fully equipped ex works, meaning there is no need for retrofitting for aluminium welding. You have three torches to choose from:

- PM 551 W Alu
- PM 551 W 2U/D X Alu
- PM 551 W RD3 X Alu

Equipment as delivered

Forced-contact tip
(Ø 1.0 mm or Ø 1.2 mm)

- Consistent contact of the wire in the contact tip
- High arc stability
- Significantly longer service life
- Spatter-free weld seams

Highly conical gas nozzle
(Ø 15 mm)

- Targeted gas flow
- High arc stability
- Welding results without burn marks

PA liner, incl. torch neck liner
(Ø 1.0 mm or Ø 1.2 mm, each in length 3 m or 4 m)

- Even, reduced-friction wire feeding
- Prevents abrasion of welding consumables
- Guarantees consistent contact

MT series – ultimate versatility

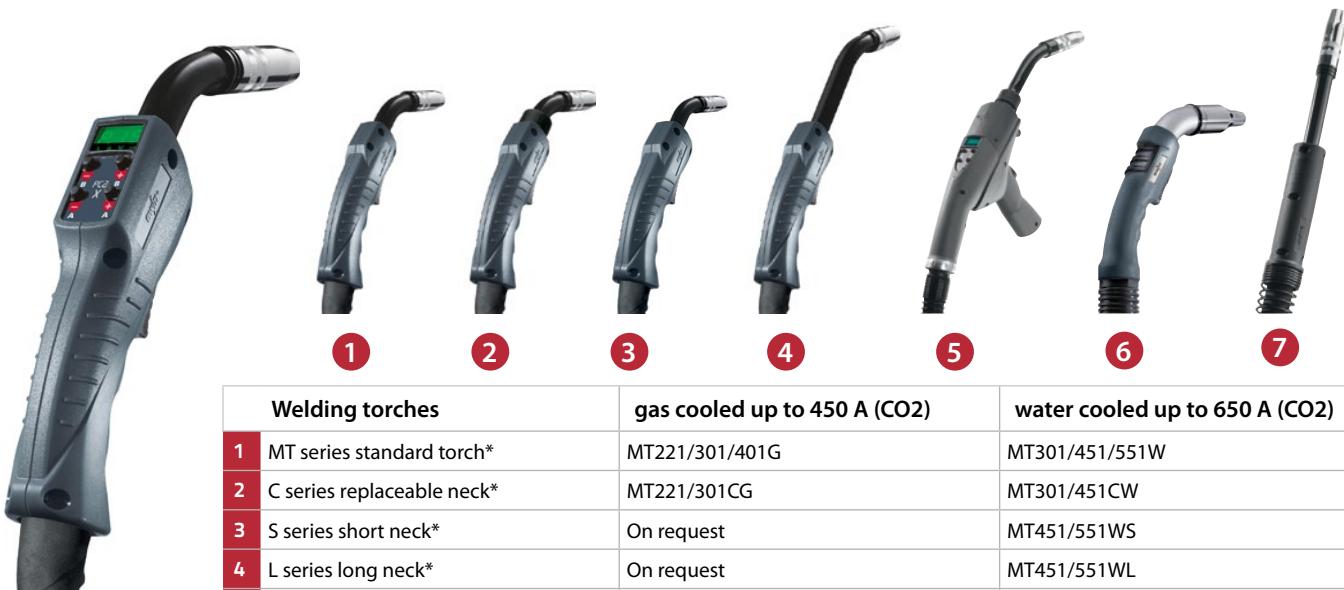

Highlights

- Robust welding torch with compact, ergonomically shaped grip
- Can be ordered as a function torch with remote-control function and segment display.
- Most suitable for use in tough environments
- Ideal balance between complete robustness and perfect handling
- The elliptical grip reduces the effort required to guide the torch.
- Thanks to X technology, function torches no longer require an annoying additional control cable.
- But, all function torches may be ordered with an additional control cable in order to connect them to machines without X technology.
- Wide variety of products: From standard welding torches with various torch necks to replaceable neck, push/pull, fume extraction and automated welding torches
- PM and MT torches ensure huge cost-saving potential with EWM consumables.
- Gas nozzles in conical, cylindrical and bottleneck shapes are available for narrow gap welding with PM and MT torches.

MT CG/CW

- Replaceable torch necks with various bend angles
- Excellent handling even in hard-to-access areas
- Torch neck can be continuously rotated through 360°

MT Push/Pull

- High-quality Maxon motor
- Self-inching
- Optional pistol grip
- Colour-coded wire feed rollers
- Plug&play with ewm machines
- Several control variants
- Remote control function

MT GF/W

- Welding torch with fume extraction
- Significantly reduces emissions in the ambient air
- Infinitely adjustable extraction nozzle
- Bypass slider to regulate the extraction rate
- Suitable for operation with high-vacuum extraction systems
- Rotating joint on hose package
- First metre has leather cover as spatter protection

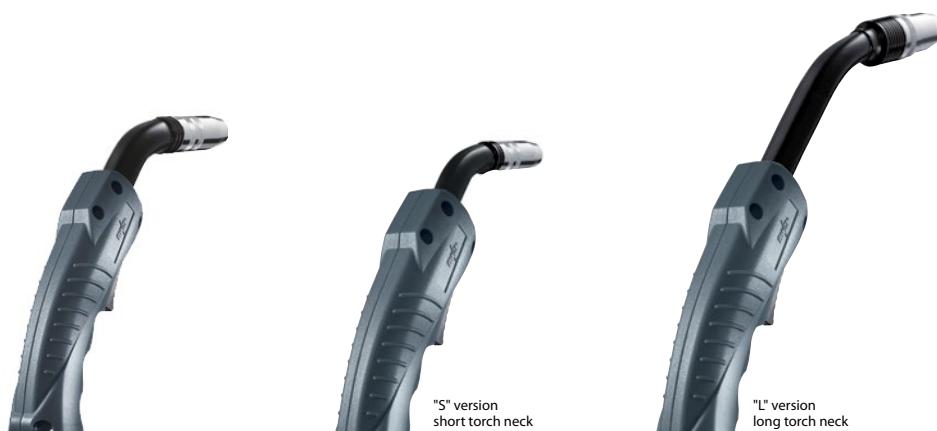

AMT

- Welding torches for automated welding
- Highly robust with long duty cycle
- Wear parts identical to standard MT torch

PM and MT torch design

PM and MT torch neck and cooling system

- Long service life thanks to profiled inner tubes for optimal cooling and greater power reserves
- Compact hose packages with coaxial cables for low weight and highest flexibility (gas-cooled torches)
- There are absolutely no fluctuations of heat or electrical conductivity, as all live components of the welding torch are made of CuCrZr.

Gas-cooled welding torch

- Internal insulation

Water-cooled welding torch

- Parallel double-coolant circuit
 - 4 conduits in inside circuit
 - 8 conduits in outside circuit

PM and MT torch neck design

Special features	Practical advantages
Inner tube firmly centred in the torch neck (specially designed for EWM Made in Germany).	<ul style="list-style-type: none"> • No deformation of the inner tube • No tension on the gas diffuser
CuCrZr inner tube incl. torch head on gas-cooled torches	<ul style="list-style-type: none"> • High stability • Less wear • Improved heat dissipation • Improved duty cycle of the torch
CuCrZr torch head for water-cooled torches	
Optimised wire feeding thanks to the larger bend radius (70 mm instead of 50 mm)	<ul style="list-style-type: none"> • Better contact • Stable welding process • Less spatter

EWM Euro torch connector

Special features	Practical advantages
Optimised exit of water hoses and control cable from the Euro torch connector housing	<ul style="list-style-type: none"> • No circuit interruption due to hose kinking • Control cable well protected
Euro torch connector housing can be opened without tools.	<ul style="list-style-type: none"> • Easy servicing and mounting
Silver-plated spring pins in the control cable	<ul style="list-style-type: none"> • Improved flow transfer, no corrosion • Pins less likely to break off or bend

PM and MT consumables system

CuCrZr meets M7/M9

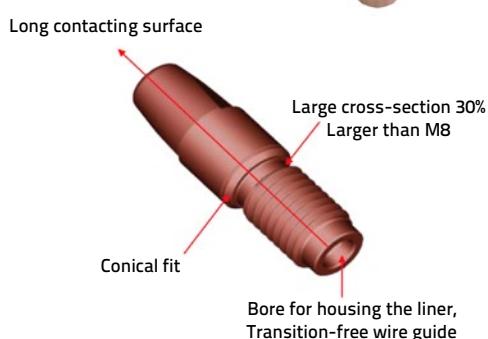

- Consumables system compatible with manual welding torches, automated welding torches, push/pull torches and fume extraction torches from the PM and MT welding torch series.
- Reduced use of consumables thanks to high-quality materials such as CuCrZr.
- Larger threaded cross sections ensure lower resistance to temperature and flow transfer and thus a longer service life.

EWM gas nozzles

- Screw-on gas nozzles ensure a secure fit, even under extreme thermal conditions.
- The centred fit of the gas nozzles ensures that shielding gas coverage remains even and consistent.
- Reduced spatter adherence thanks to nickel-plated surface and improved heat dissipation
- A diverse range of options: Narrow-gap gas nozzles, highly conical gas nozzles, spot welding nozzles
- Long service life
- Every PM/MT welding torch series has specially designed gas nozzles, thus preventing installation of incompatible nozzles.

EWM contact tips

- Optimum heat transfer thanks to the 30% larger material cross-section and conical fit of the contact tip in the M7/M9, compared to conventional M6/M8 thread sizes.
- Made of CuCrZr, EWM contact tips boast much greater wear resistance than standard E-Cu nozzles.
- Conical limit stop of the contact tip for a secure fit, precise centring and optimal flow and heat transfer
- The precisely centred contact tip allows for far greater precision and repeat precision, especially in mechanised applications.
- The bore means the liner sits well in the contact tip, thus ensuring transition-free wire guiding.
- Long contacting surface for better flow transfer and arc stability
- A diverse range of equipment means the torch can be perfectly customised for any application.
- M7/M9 or alternatively Standard M6/M8

EWM contact tip holders

- All EWM contact tip holders are manufactured using wear-resistant CuCrZr for optimal functionality – even in tough conditions.
- CuCrZr offers better heat and current conductivity than standard brass contact tip holders.
- Various versions mean you can alter the fit of the contact tip. This allows you to customise the torch perfectly for any application.
- M7/M9 or alternatively Standard M6/M8

EWM gas diffusers

- High stability thanks to high-tensile, temperature-resistant special plastic
- Even distribution of welding gas, thus ensuring optimal shielding gas coverage
- Every PM/MT torch series has specially designed gas diffusers, thus preventing installation of incompatible diffusers.

PM and MT consumables system

Narrow gap welding with EWM PM and MT torches

- Better accessibility for root welding and positional welding
- Reduction in the included angle when used with EWM forceArc
- Cylindrical nozzle shape:
- With replaceable gas nozzle tip (just one low-cost consumable)
- Insulated built-on gas nozzle tip
- Robust design with its centred contact tip (less build-up of spatter, less wear)

For narrow gap welding, gas nozzles in conical, cylindrical and bottleneck shapes are available.

ISW Steel Components relies on EWM welding equipment.

8 hours, 350 amperes, 1 contact tip

Even though it is one of the smallest components in a welding machine, the contact tip is crucial to the process. It doesn't just conduct the welding current of 350 amperes and more to the wire electrode, but also guides this welding consumable to the welding spot. In 2008, the company switched all its welding production over to EWM products: the welders tested machines from three major manufacturers and decided on the machines from the Westerwald welding machine manufacturer.

Existing automation solutions have been retrofitted over the past few years. The robotic welding system was equipped with a new power source – an alpha Q

The M9 contact tips used by ISW have a 15 per cent longer contacting surface compared to the M8 contact tip, as well as a 30 per cent larger threaded cross section. The contact with the welding wire is better and heat is dissipated more effectively. This increases the service life of the contact tip.

Limberger, Managing Director of ISW. "And this is even though we use high currents of 350 amperes and more."

Functionalities of the welding torch

A particular advantage according to ISW is that the same contact tips are used for both the MT or, as of late, the PM series of EWM welding torches when welding manually. The downtime during manual manufacturing is also significantly reduced thanks to the longer service life of the consumables.

"The nozzle can probably last longer, but we prefer to err on the side of caution".

This improves productivity. However, there is also another feature of the welding torch that is particularly advantageous for welders: no need to walk back and forth.

from EWM. It is equipped with Titan technology with all the innovative EWM welding processes and new EWM welding torches for automated use. Plus, the system was also connected to ewm Xnet 2.0.

Only EWM contact tips have been used for automated manufacturing since then. EWM contact tips are made from high-quality CuCrZr and have a 15 per cent longer contacting surface compared to the M8 standard contact tip, as well as a 30 per cent larger threaded cross section. Contact with the welding wire is better and heat is dissipated more effectively.

A contact tip can remain in a torch for up to eight hours of welding. This is the average length of time it takes to weld a component in the automated system. As a result, throughput times could be increased. Previously, contact tips only lasted a maximum of one hour. Now, an entire component can be finished with EWM. "The nozzle can probably last longer, but we prefer to err on the side of caution," said Stefan

the relevant parameters can be set directly on the welding torch. Thus, reducing the need to walk a long way back to the welding machine. This is particularly useful for welders when working on large components or in hard-to-reach places. They can adjust the parameters without leaving their position. The LED lighting on the welding torch lights up dark working areas and the ergonomic and convenient design, as well as the balance and weight of the welding torch are other features that make work significantly easier for welders.

Up to 10% more trailers annually per workstation

Hüffermann switch all welding production over to EWM products

Durable torch consumables minimise replacement times.

The most impressive feature of welding torches from EWM is the long service life of the consumables, especially the contact tip. In the past, this part had to be replaced three times a day. Nowadays, every EWM nozzle lasts around a week. With a replacement time of only five minutes, the time saved just by using the EWM consumable amounts to 15 minutes a day, which is equivalent to five hours a month. At some workstations, the nozzles even last five to six weeks. As the welding procedure is very stable

The most impressive feature of welding torches from EWM is the long service life of the consumables.

and the arc is so well covered by the laminar gas flow, the entire welding procedure is virtually spatter-free – this also makes replacement of the gas nozzle obsolete. It simply doesn't get dirty.

The fact that the welding torches use the same consumables for both manual welding and automated welding makes order management and warehousing especially easy.

The welding torch is equipped with an integrated remote control. This enables welders to switch back and forth between the various programs directly at the welding torch, eliminating the need to go back to the power source. "Not having to go back and forth makes

things enormously easier for welders," said Völker in regard to this advantage. The time which used to be spent going back and forth can now be spent welding, which increases productivity accordingly.

The X technology function torch requires no additional control cable with plugs. This makes the torch hose package lighter and increases service life.

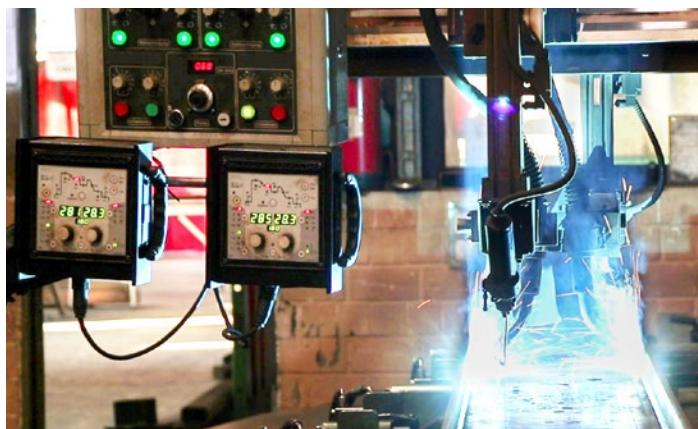

Easy wire feeding from above

Thanks to the introduction of an articulated arm, welders' work has been made especially easier. The wire feeder is

This makes the welder's job much easier

located at a height of 3.5 m on a swivelling mount above the welding area. The welding torch and hose package also come from there. This not only makes welders' work much easier, as they don't always have to lift the hose package, but it makes their work much more comfortable, as there are no longer things lying around on the floor – like the intermediate hose package and wire feeder. Thanks to the easy-to-move joint, the welding torch is always right where it should be.

The hose package is 6.5 metres long, which makes the working radius especially large. This great length has been made possible by increasing the wire diameter from 1.0 to 1.2 mm.

Automated production of the base support with two EWM AMT welding torches in parallel. Thanks to forceArc puls, distortion is reduced, welding speed is increased and process reliability is raised.

The swivelling articulated arm with wire feeder and supply line to the welding torch are located above the workstation. The 6.5-metre-long welding torch hose package facilitates working within a large area.

Highlights

- Impressive overall package: Solid technology and the sophisticated grip design guarantee good handling.
- High working comfort for everyday use
- Time-tested consumables concept with standard M6 and M8 threads
- Robust, ergonomic grip
- Rubber inserts and a ball joint on the grip for safe, precise operation
- Impressive price/performance ratio
- Suitable for any machine with a Euro torch connector

Special torch design according to your specifications

Whether you're looking for MIG/MAG, TIG or Plasma – we build the perfect welding torch for your application

In addition to our in-house series production of welding torches, we also manufacture welding torches tailored to your specific application. This way, we guarantee you the very best component for your welding task – for both manual and automated welding.

Highlights

- Wide product range: from gas-cooled or replaceable-neck torches through to fume extraction torches
- EWM's own consumables guarantee a long service life and best integration into the welding system

Automated welding inside pipes with an extra-long torch neck

MAG hot wire welding

- Cladding with a deposition rate up to 13.8 kg

Welding inside pipes with extra long torch neck and small bend radius

Applications

Task scope:

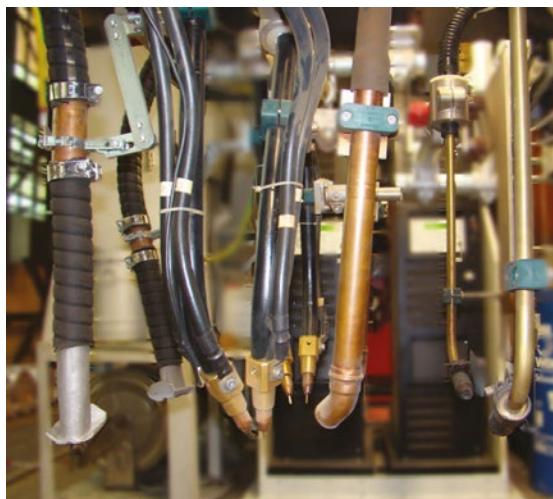

- Welding inside steel structures

EWM solution:

- Torch neck based on the MT551W with a length of 1,500 mm

Customer benefit:

- Welding location easily accessible
- Improved visibility of the seam
- Reduced costs due to use of standard MT consumables

Task scope:

- Reduce downtimes during automated welding of steel structures

EWM solution:

- Welding torch with water-cooled gas nozzle and exchangeable gas nozzle tip

Customer benefit:

- The targeted cooling of the gas nozzle enables a duty cycle of 650 A/100%
- High cost savings thanks to separate exchange of the gas nozzle tip
- Other consumables are standard MT consumables.

Task scope:

- Space-saving welding torch for use at longitudinal carriages and orbital welding installations

EWM solution:

- Automated welding torch based on AMT551W with a total length of just 61 mm

Customer benefit:

- More compact design of the longitudinal carriages
- Orbital welding installations require less space to go round the pipe
- Reduced costs due to use of standard MT consumables

Wire feed roll mount wear set eFeed (092-002960-E0000)

The plastic adapter of the wire feed roll mount of the eFeed drive may wear out after long intensive loads. This wear may cause problems in the wire feeding.

EWM recommends: An annual check of the wire feed roll mount as part of the test EN 60974-4. and a replacement after 2,000 hours of running time

Capillary tube/guide tube for EWM machines and wire feeders

The use of capillary or guide tubes ensures optimum wire feeding from spool to weld pool.

Recommendation:

- Use a steel liner with a capillary tube to weld hard, unalloyed wire electrodes (steel).
- For welding or brazing of soft or alloyed wire electrodes, use a plastic liner with a guide tube

The Euro torch connectors on our wire feeders and welding machines are equipped with a capillary tube for welding torches with steel liners (for wires ≤ 1.6 mm) ex-works. The Euro torch connector needs to be modified accordingly on the machine if a welding torch with a plastic liner is used!

If welding torches and the Euro torch connector are not equipped in line with the wire electrode used, there will be problems with wire feeding:

- Bird nest
- Jolting, irregular wire feed; the whole wire feed system may get jammed

Use on wire feeders with eFeed drive:

PM welding torch presentation case

Item number: 094-025373-00000

Patented* cooling system

- Gas cooled
- Internal insulation
- Inner tube made of CuCrZr

* EP 2407268 B1

1 Parallel double-circuit cooling

- Water cooled
- 4 conduits in inside cooling circuit
- Shielding gas conduit and insulation (white)
- 8 conduits in outside cooling circuit

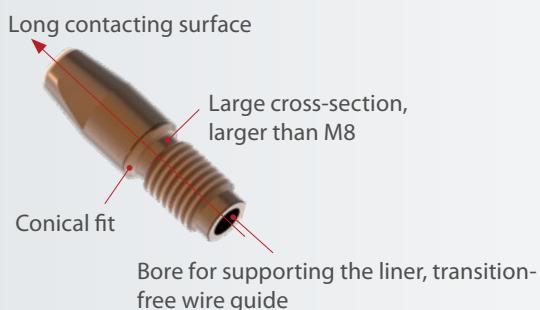

2 Conical fit for CG and CW replaceable neck welding torches

3 Pistol grip

- With integrated consumables key

4 EWM M7/M9 contact tips

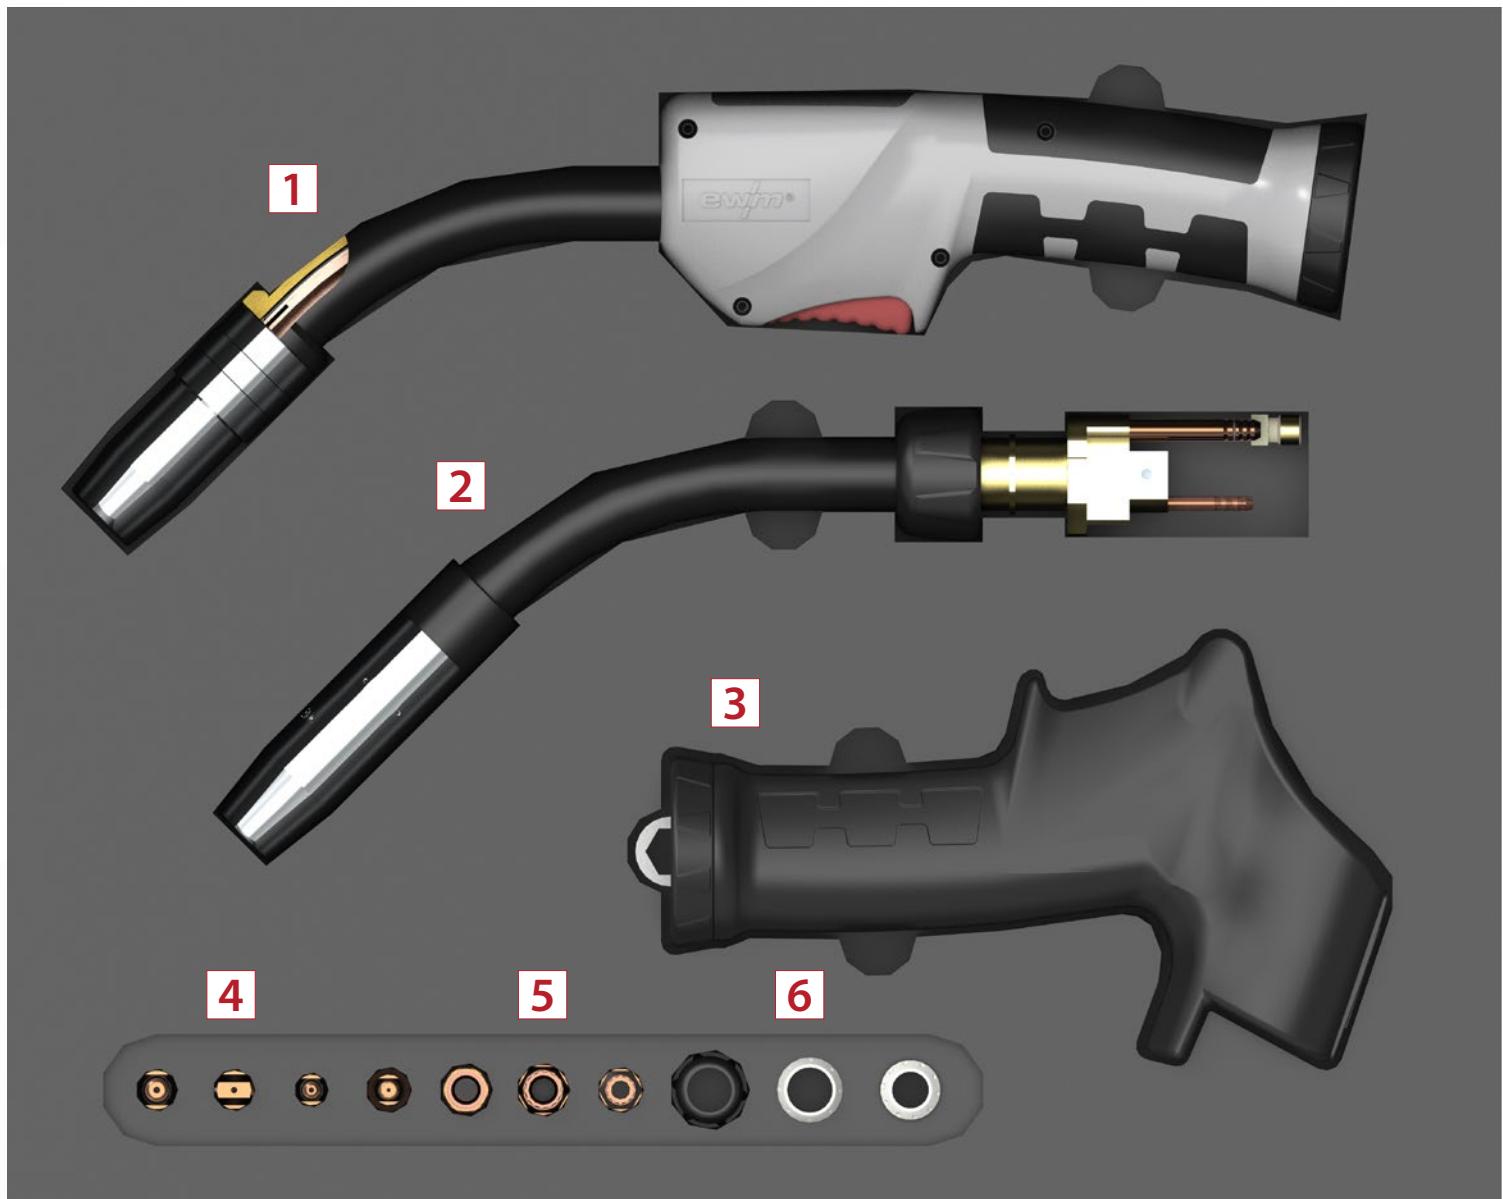

- Longer service life and better heat transfer compared to standard M6/M8 nozzles thanks to 30% larger material cross-section and conical fit

5 Contact tip holders

6 Gas diffuser

- Made of a high-tensile, temperature-resistant special plastic

PM welding torch presentation case

Item number: 094-025373-00000

1 Standard PM welding torch

- Available with or without LED lighting

2 2U/D X function torch

Setting of:

- Welding current and wire feed speed
- Voltage correction or
- Welding programs
- LED lighting
- Also available with control cable (without LED lighting)

3 RD2 X function torch

- Display and setting of:
- Welding current and wire feed speed
- Voltage correction or
- Welding programs
- LED lighting

4 RD3 X function torch

Display and setting of:

- Welding current and wire feed speed
- Voltage correction
- Welding procedure
- Welding programs and tasks (JOBS)
- Operating mode: non-latched/latched
- LED lighting
- Component management

5 Optional torch trigger on top

Available with or without LED lighting

6 Heat protection shield

7 EWM narrow-gap gas nozzle

- Screw-on gas nozzle ensures secure fit even under extreme thermal conditions
- Reduced spatter adhesion thanks to the nickel-plated surface and improved heat dissipation

PM welding torch presentation case

Item number: 094-025373-00000

1 Standard PM 551 WS welding torch with consumables, ball joint and rubber anti-kink device

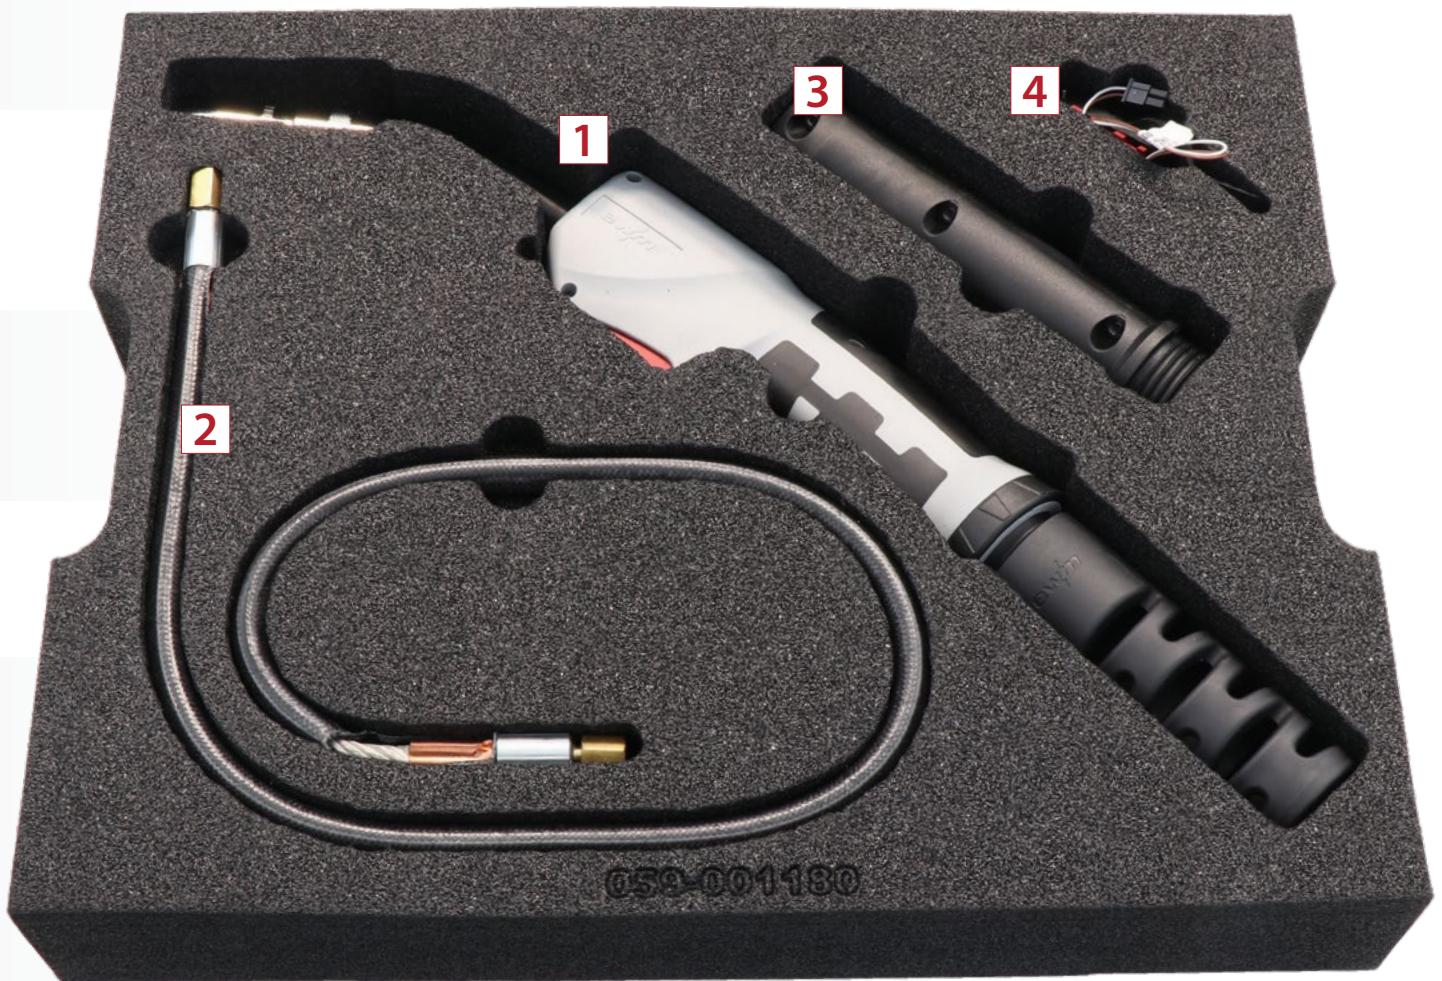

2 Tin-plated power/water cable

- Less oxidation
- No silting of the coolant
- Reinforced hoses

3 Grip for automated welding torches

- Ø 38 mm in clamping range

4 Optional torch trigger extension

- Secure hold thanks to rubber inserts in the grip
- The flexible ball joint makes it comfortable to work, even for positional welding
- The torch trigger protection prevents the arc being ignited unintentionally

Equipment as delivered (steel wire Ø 1.0 mm):

- Gas nozzle Ø 13 mm; 66 mm
- Gas diffuser Ø 14 mm; 12.5 mm
- Contact tip M7 x 30 mm; Ø 1.0 mm and contact tip holder M7 x 31.5 mm
- Steel liner blue; Ø 1.5 mm x 3.8 mm

Duty cycle CO2	250 A / 60 %
Duty cycle M21	220 A / 60 %
Duty cycle M21 pulse	150 A / 60 %
Wire Ø	0.8 mm - 1.2 mm
Connection	Euro torch connector
Bend angle torch neck	45 °
Approvals	CE sign

Replacement parts set PM 221 G

Set Steel/CrNi M7 221 G / 301 W

- Replacement parts set for PM 221 G/MT221G and PM 301 W/MT301W welding torches
- Consumables set, steel/CrNi, M7:
- 5 x contact tip 0.8 mm, 1.0 mm and 1.2 mm
- 2 x contact tip holder 31.5 mm and 34.5 mm
- 1 x gas nozzle 11 mm, 13 mm and 16 mm
- 1 x gas diffuser 11.1
- 1 x torch key
- 1 x gas nozzle cleaner

Wire Ø	0.8 mm - 1.2 mm
Thread, contact tip	M7
Usage	ST, CrNi, CuSi, AlBz

MIG/MAG welding torches - Gas-cooled PM welding torches

PM 301 G

„Consumables PM 301 G“ on page 66

- Secure hold thanks to rubber inserts in the grip
- The flexible ball joint makes it comfortable to work, even for positional welding
- The torch trigger protection prevents the arc being ignited unintentionally

Equipment as delivered (steel wire Ø 1.0 mm):

- Gas nozzle Ø 15 mm; 71 mm
- Gas diffuser Ø 17 mm; 14 mm
- Contact tip M9 x 35 mm; Ø 1.0 mm and contact tip holder M9 x 34.5 mm
- Steel liner blue; Ø 1.5 mm x 3.8 mm

MIG/MAG welding torches - Gas-cooled PM welding torches

PM 401 G

„Consumables PM 401 G“ on page 72

- Secure hold thanks to rubber inserts in the grip
- The flexible ball joint makes it comfortable to work, even for positional welding
- The torch trigger protection prevents the arc being ignited unintentionally

Equipment as delivered (steel wire Ø 1.2 mm):

- Gas nozzle Ø 17 mm; 66 mm
- Gas diffuser Ø 20 mm; 21.5 mm
- Contact tip M9 x 35 mm; Ø 1.2 mm and contact tip holder M9 x 35 mm
- Steel liner red; Ø 2 mm x 4.6 mm

Duty cycle CO2	450 A / 35 %
Duty cycle M21	400 A / 35 %
Duty cycle M21 pulse	260 A / 35 %
Wire Ø	0.8 mm - 2 mm
Connection	Euro torch connector
Bend angle torch neck	45 °
Operating weight	1.3 kg
Approvals	CE sign

- Secure hold thanks to rubber inserts in the grip
- The flexible ball joint makes it comfortable to work, even for positional welding
- The torch trigger protection prevents the arc being ignited unintentionally

Equipment as supplied (steel wire 1.2 mm):

- Gas nozzle Ø 13 mm; 66 mm
- Gas diffuser Ø 14.5 mm; 12.5 mm
- Contact tip M7 x 30 mm; Ø 1.2 mm and contact tip holder M7 x 31.5 mm
- Steel liner red; Ø 2 mm x 4.6 mm

Duty cycle CO2	330 A / 100 %
Duty cycle M21	290 A / 100 %
Duty cycle M21 pulse	250 A / 100 %
Wire Ø	0.8 mm - 1.2 mm
Connection	Euro torch connector
Bend angle torch neck	45 °
Approvals	CE sign

PM 301 W

- Water-cooled MIG/MAG welding torch
- Fits all welding machines with a Euro torch connector

Operating weight	1.03 kg

PM 301 W LED X

- Water-cooled MIG/MAG welding torch
- Automatic LED lighting when the welding torch is moved
- The complete range of functions of PM function torches is only available when used in connection with the Titan XQ puls machine series
- If the function torch is connected to EWM MULTIMATRIX or Taurus Steel welding machines, the welding torch switches to compatibility mode and has limited functions
- If the welding torch is connected to third-party machines or welding machines without MULTIMATRIX technology, welding is not possible

- Water-cooled MIG/MAG welding torch with replaceable neck (torch neck rotatable through 360°)
- Fits all welding machines with a Euro torch connector
- You can find suitable torch necks with various bend angles in the “Push/pull welding torches” chapter.
- Worn o-rings have a negative impact on the welding torch cooling. Insufficient cooling causes damage to the welding torch. Check and if necessary grease or replace all o-rings when converting the welding torch! Please note spare parts list in the “Push/pull welding torches” chapter.

 - Welding process switching
 - Interferences and error messages
- **Xnet support:**
 - Selection of welding tasks according to welding sequence plan
 - Component management
- Automatic LED lighting when the welding torch is moved
- The complete range of functions of PM function torches is only available when used in connection with the Titan XQ puls machine series
- If the function torch is connected to EWM MULTIMATRIX or Taurus Steel welding machines, the welding torch switches to compatibility mode and has limited functions
- If the welding torch is connected to third-party machines or welding machines without MULTIMATRIX technology, welding is not possible
- **Recommended use for 6.5 m hose packages:** For steel and CrNi with a wire diameter of 1.2 to 1.6 mm only

- Secure hold thanks to rubber inserts in the grip
- The flexible ball joint makes it comfortable to work, even for positional welding
- The torch trigger protection prevents the arc being ignited unintentionally

Equipment as supplied (steel wire Ø 1.2 mm):

- Gas nozzle Ø 17 mm; 66 mm
- Gas diffuser Ø 20 mm; 21.5 mm
- Contact tip M9 x 35 mm; Ø 1.2 mm and contact tip holder M9 x 35 mm
- Steel liner red; Ø 2 mm x 4.6 mm

Duty cycle CO2	650 A / 100 %
Duty cycle M21	550 A / 100 %
Duty cycle M21 pulse	500 A / 100 %
Wire Ø	0.8 mm - 2 mm
Connection	Euro torch connector
Approvals	CE sign

PM 551 W RD3 X Alu

- Water-cooled MIG/MAG function torch with high-quality OLED graphic display
- **Display and setting of:**
 - Welding current and wire feed speed
 - Voltage correction
 - Program and JOB selection
 - Operating mode and welding type
 - Welding process switching
 - Interferences and error messages
- **Xnet support:**
 - Selection of welding tasks according to welding sequence plan
 - Component management
- Automatic LED lighting when the welding torch is moved
- The complete range of functions of PM function torches is only available when used in connection with the Titan XQ puls machine series
- If the function torch is connected to EWM MULTIMATRIX or Taurus Steel welding machines, the welding torch switches to compatibility mode and has limited functions
- If the welding torch is connected to third-party machines or welding machines without MULTIMATRIX technology, welding is not possible

Options PM welding torches

Torch grip option

- Pistol grip for PM welding torch
- Compatible with all PM standard and function torches
- Handle is quick and easy to assemble.
- Assembly tool is included in the supply package.
- **Benefits for you:**
- Easy, fatigue-free operation, even with long weld seams
- Natural positioning of the wrist
- LED lighting is included in the entire range
- Practical mounting of the torch key inside the handle
- Not compatible with extended torch trigger

Designation	Item no.	PG	Price Per unit
Optional pistol grip for PM welding torch	092-007944-00000	B2	65.00 €

Torch trigger extension

- Torch trigger extension for PM welding torches including installation tool
- The torch trigger extension for PM welding torches with LED lighting can only be fitted to PM welding torches using X technology. The „ON LED PM Standard“ option is absolutely necessary in order to retrofit the LED lighting on standard PM welding torches!

Designation	Item no.	PG	Price Per unit
Torch trigger extension for PM welding torches with LED	094-023891-00000	B2	36.50 €
Torch trigger extension for PM standard welding torches	094-022327-00000	B2	29.00 €

Conversion kit, upper torch trigger

- Conversion kit for “torch trigger at top” including tool for installation

Designation	Item no.	PG	Price Per unit
Conversion kit, torch trigger on top for PM standard welding torches	092-007938-00000	B2	63.80 €
Conversion kit, torch trigger at the top for PM welding torches with LED	092-007939-00000	B2	103.00 €

LED lighting retrofit set

- Retrofit set "LED lighting" including installation tool
- For standard PM welding torches without LED built-in by the manufacturer
- LED lighting only works on Titan XQ puls and EWM Multimatrix welding machines.

Designation	Item no.	PG	Price Per unit
LED lighting retrofit kit for PM standard torches	092-007940-00000	B2	110.00 €

Heat protection shield

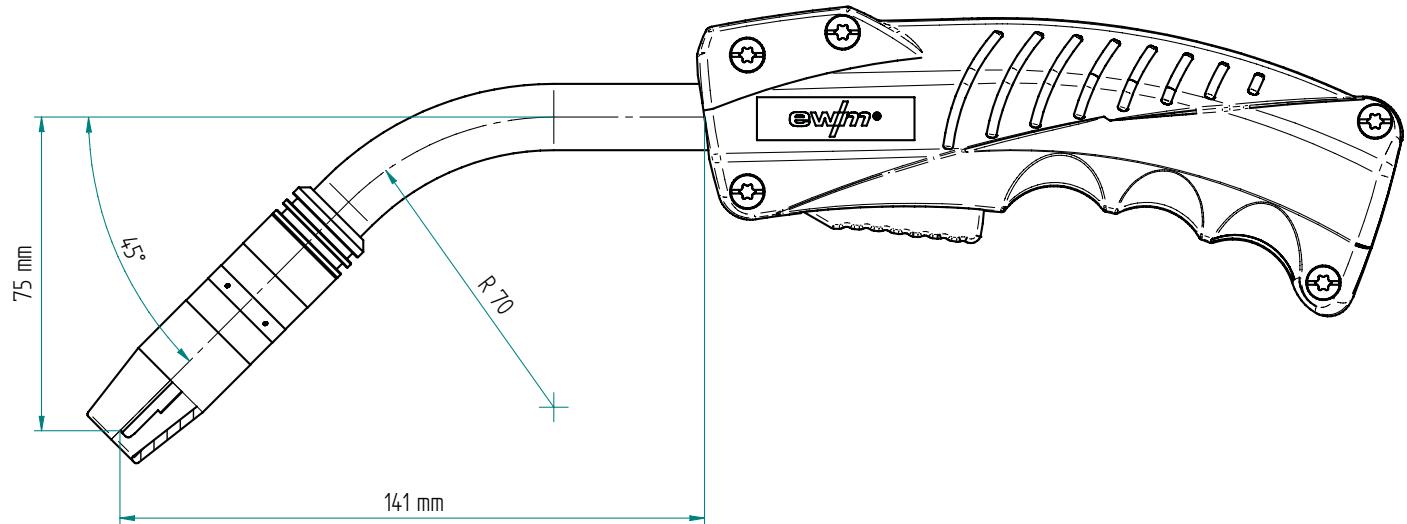

- Heat protection shield for retrofitting PM/MT torch
- Thanks to the predetermined breaking point, also compatible with PM welding torches with LED lighting (limited, however, on replaceable neck torches)
- **Suitable for:**
 - PM/MT 301 G, CG
 - PM/MT 401 G, CG
 - PM/MT 451 W, WS, WL
 - PM/MT 551 W, WS, WL

Designation	Item no.	PG	Price Per unit
Heat protection shield for PM/MT welding torches	094-025359-00000	B2	32.50 €

- Gas-cooled MIG/MAG function torch with replaceable neck (torch neck rotatable through 360°)
 - Displaying and setting of welding current and wire feed speed
 - Program selection also available as an option
- MT function torch with X technology only suitable for Titan XQ puls, EWM MULTIMATRIX or Taurus Steel welding machines
- If the welding torch is connected to third-party machines or welding machines without MULTIMATRIX technology, welding is not possible
- Torches with additional control cable for connection to EWM welding machines without Multi-matrix technology
- You can find suitable torch necks with various bend angles in the “Push/pull welding torches” chapter.

MIG/MAG welding torches - Gas-cooled MT welding torches

MT301G

„Consumables MT301G“ on page 146

MT301CG PC2X /// MT301CG PC2

- Gas-cooled MIG/MAG function torch with replaceable neck (torch neck rotatable through 360°)
- Display and setting of:**
 - Welding current and wire feed speed
 - Voltage correction
 - Program and JOB selection
- MT function torch with X technology only suitable for Titan XQ puls, EWM MULTIMATRIX or Taurus Steel welding machines
- If the welding torch is connected to third-party machines or welding machines without MULTIMATRIX technology, welding is not possible
- Torches with additional control cable for connection to EWM welding machines without Multi-matrix technology
- You can find suitable torch necks with various bend angles in the “Push/pull welding torches” chapter.

Consumables set MT301G

Set Steel/CrNi M9 301 G / 451 W

- Replacement parts set for PM 301 G/MT301G and PM 451 W/MT451W welding torches
- Consumables set, steel/CrNi, M9
- 5 x contact tip 0.8 mm, 1.0 mm and 1.2 mm
- 2 x contact tip holder 34.5 mm and 37.5 mm
- 1 x gas nozzle 13 mm, 15 mm and 18 mm
- 1 x gas diffuser 13.1 mm
- 1 x torch key
- 1 x gas nozzle cleaner

Wire Ø	0.8 mm - 1.2 mm
Thread, contact tip	M9
Usage	ST, CrNi, CuSi, AlBz

Consumables set MT401G

Set Steel/CrNi M9 401 G / 551 W

- Replacement parts set for PM 401 G/MT401G and PM 551 W/MT551W welding torches
- Consumables set, steel/CrNi, M9
- 5 x contact tip 1.0 mm, 1.2 mm and 1.6 mm
- 2 x contact tip holder 35 mm and 38 mm
- 1 x gas nozzle 15 mm, 17 mm and 19 mm
- 1 x gas diffuser 20 mm
- 1 x torch key
- 1 x gas nozzle cleaner

Wire Ø	1 mm - 1.6 mm
Thread, contact tip	M9
Usage	ST, CrNi, CuSi, AlBz

- Water-cooled MIG/MAG welding torch with replaceable neck (torch neck rotatable through 360°)
- Fits all welding machines with a Euro torch connector
- You can find suitable torch necks with various bend angles in the “Push/pull welding torches” chapter.
- Worn o-rings have a negative impact on the welding torch cooling. Insufficient cooling causes damage to the welding torch. Check and if necessary grease or replace all o-rings when converting the welding torch! Please note spare parts list in the “Push/pull welding torches” chapter.

- Water-cooled MIG/MAG welding torch with replaceable neck (torch neck rotatable through 360°)
- Fits all welding machines with a Euro torch connector
- You can find suitable torch necks with various bend angles in the “Push/pull welding torches” chapter.
- Worn o-rings have a negative impact on the welding torch cooling. Insufficient cooling causes damage to the welding torch. Check and if necessary grease or replace all o-rings when converting the welding torch! Please note spare parts list in the “Push/pull welding torches” chapter.

Consumables set MT551W

Set Steel/CrNi M9 401 G / 551 W

- Replacement parts set for PM 401 G/MT401G and PM 551 W/MT551W welding torches
- Consumables set, steel/CrNi, M9
- 5 x contact tip 1.0 mm, 1.2 mm and 1.6 mm
- 2 x contact tip holder 35 mm and 38 mm
- 1 x gas nozzle 15 mm, 17 mm and 19 mm
- 1 x gas diffuser 20 mm
- 1 x torch key
- 1 x gas nozzle cleaner

Wire Ø	1 mm - 1.6 mm
Thread, contact tip	M9
Usage	ST, CrNi, CuSi, AlBz

MIG/MAG welding torches - Fume extraction torch

MT221G F

- Equipment as delivered (steel wire Ø 1.0 mm):
- Gas nozzle Ø 13 mm; 66 mm
- Gas diffuser Ø 14 mm; 12.5 mm
- Contact tip M7 x 30 mm; Ø 1.0 mm and contact tip holder M7 x 31.5 mm
- Steel liner blue; Ø 1.5 mm x 3.8 mm

MT221G F

- Gas-cooled MIG/MAG fume extraction torch
- Continuously adjustable extraction nozzle
- Bypass valve to regulate the extraction rate
- For operation with high-vacuum extraction systems

Duty cycle CO2	250 A / 60 %
Duty cycle M21	220 A / 60 %
Duty cycle M21 pulse	150 A / 60 %

Welding torch components and design

Components

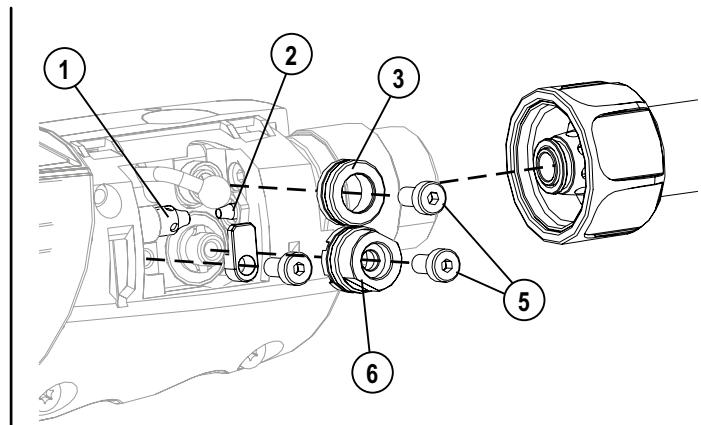

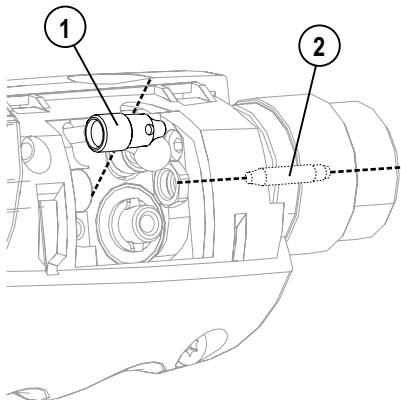

Please note that all necessary components must be ordered separately. This ensures that you are able to equip your welding torch according to your requirements, right from the start.

Item	Type
10.01	Gas nozzle
10.02	Contact tip
10.03	Contact tip holder
10.04	Gas diffuser
10.05	Gas- or water-cooled torch neck with different rated outputs and bend angles
10.06	Wire feed rolls for different welding consumables and wire diameters
10.07	Gas- or water-cooled push/pull drive unit with different lengths
10.08	Optional: Pistol grip

Example order: Push/pull 8 m, up/down, gas cooled, for steel wire 1.0

Up/down drive unit for gas-cooled welding torch (PP MTCG U/D) 8 m 094-500107-00208	Torch neck MT301CG, 45° 094-017526-E0000	Original equipment set, steel 092-003674-00010

Gas-cooled push/pull welding torches

PP MTCG

- Drive unit with hose package
- Torch necks with various bend angles may be ordered separately
- Wire feed roller may be ordered separately
- The push/pull torch body PP MTCG can be equipped with the torch necks TN MT221CG or TN MT301CG
- Pistol grip can be mounted without conversion
- Self-inching
- Colour-marked wire feed rollers
- Plug&play with EWM machines

TIG welding torches – TIG series

Highlights

- Manual, automatic, cold/hot wire and spot welding torches are all available.
- All manual welding torches from the TIG series are fitted with an ergonomic grip for extra-secure handling and an optimal feel when operating the torch.
- **Two consumables systems:**
 - TIG-SR for simple applications
 - TIG for power-intensive welding processes such as AC TIG or welding tasks with intense radiated heat (DC copper welding).
- EWM's TIG series is optimally matched to the strict requirements of today's industry and integrates innovative welding process like no other torch range.

Welding torch design

Consumables system

- TIG consumables system
- or TIG-SR consumables system

The perfect control for every user

- Double push-button
- Up/Down
- Retox
- Rotary gas valve: Optimised for TIG welding using MMA welding machines without gas valves (Pico series)

Top handling in any position

- Standard hose package
- or high flex leather version (HFL)
 - The first metre from the handle is covered in very hard-wearing yet soft nappa leather.
 - Robust and flexible
 - Maximum flexibility combined with optimum insulation
 - High flexibility thanks to special hoses and leads inside the hose package

It's your choice:

- Rigid torch neck
- or flexible torch neck (F) for optimal ergonomics in all welding positions and better accessibility

Ergonomic grip handle

- Grip handle ensures secure handling
- The Grip-Little handle allows welding to be carried out even in the tightest areas thanks to its extremely compact design.
- Optimal handling and maximum freedom of movement thanks to a ball joint and a light hose package.

Overview of TIG welding torch controls

- In order to meet the significant demands of TIG welding, the torches are available in a wide range of different models and can be fitted with a vast array of equipment.

Double push-button

- Large torch trigger with optimal pressure point
- Functions:
 - Switching the welding current on and off
 - During welding, the current can be reduced to a secondary current by tapping it.

Up/Down

- TIG up/down torches are equipped with two torch rocker switches.
- Functions:
 - Switching the welding current on and off
 - During welding, the current can be reduced to a secondary current by tapping it.
 - Continuous raising of the welding current during the welding process (Up function)
 - Continuous reduction of the welding current during the welding process (Down function)
 - In case of Synergic control, JOB switching is also possible.

Retox

- TIG Retox torches are equipped with two torch rocker switches.
- Functions:
 - Switching the welding current on and off
 - During welding, the current can be reduced to a secondary current by tapping it.
 - Continuous raising of the welding current during the welding process (Up function)
 - Continuous reduction of the welding current during the welding process (Down function)
 - Access to welding tasks (JOBS) defined on the welding machine
- Indicators for:
 - Welding current
 - or selected welding tasks (JOB numbers)

Single-push button

- Optimised for TIG welding with Euro torch connector (MIG/MAG welding machines)
- Functions:
 - Switching the welding current on and off

TIG welding torches – TIG series

SR consumables system

- The original TIG welding torch
- Internationally recognised standard
- Extremely simple design, low cost
- No noteworthy further development on a technical level
- Suitable for simple applications

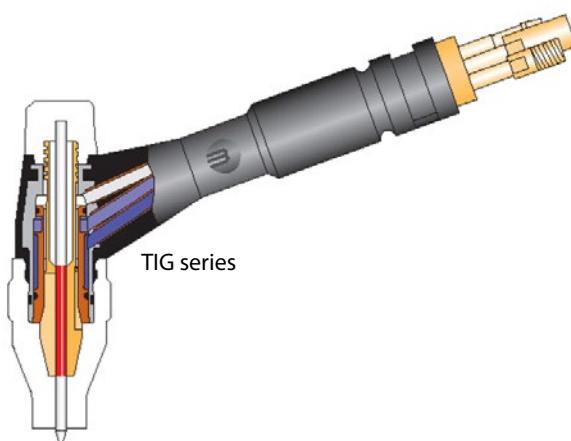

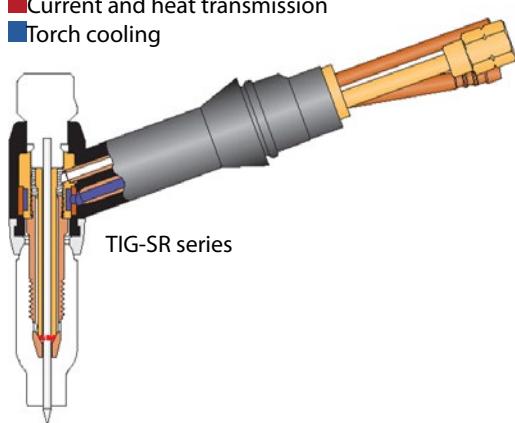

TIG consumables system

- Components streamlined to three consumables:
 - Back cap
 - Electrode holder or gas diffuser
 - Gas nozzle
- As a result, easily manageable warehousing and lower overall costs
- Easier adjustment of tungsten needle
- Simpler, quicker change of consumables
- No copies, so optimum quality assured
- For power-intensive welding processes such as AC TIG or welding tasks with intense radiated heat (DC copper welding)

TIG consumables system: 35% less heat development than TIG-SR consumables system

- The reduced distance between the power-transmitting surface and the cooling module together with the larger cooling areas of the consumables reduce the temperature at the front of the gas nozzle on the TIG torch by up to 180 °C.

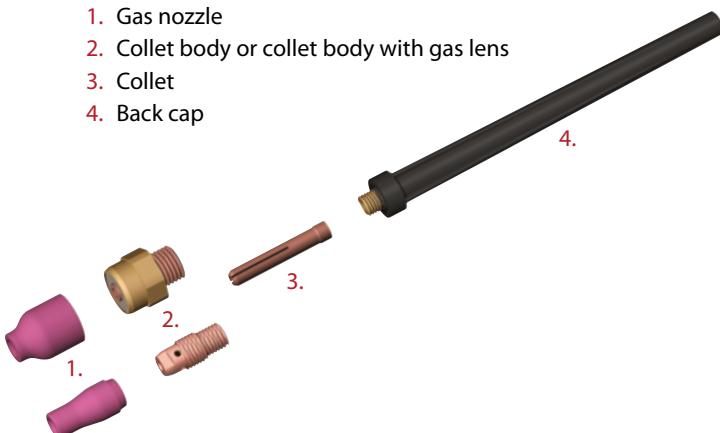

■ Current and heat transmission
■ Torch cooling

TIG automated welding torch (TIG-MT series)

TIG spot welding torch (spotArc)

TIG cold/hot wire torches

High process reliability, high welding speed, extremely simple handling

You are optimally equipped for every task with our cold/hot wire torches, whether you require long weld seams, work in confined spaces or need positional welding.

We offer four different welding torches for your cold/hot wire welding tasks – there is one suitable for every application: small, versatile and high-performing with optimum shielding gas coverage.

Cold/hot wire torch with external wire feed

- Ideal for welding very hard or very soft wires (aluminium, chrome/nickel)
- No jamming of the wire in narrow feed spots

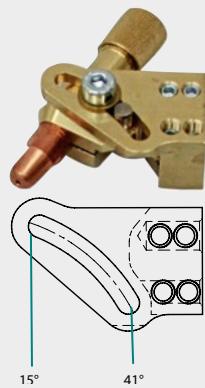

Cold/hot wire torch with internal wire feed

- Optimum handling since there is no wire feed in the way
- Excellent freedom of movement when welding

Our welding torches are fitted with a flexible wire support as standard. A large number of other equipment options are available to you to meet all application needs*:

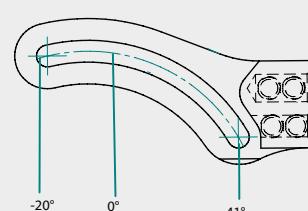

Flex bracket, short

- Standard equipment
- Can be used for most applications
- Freely adjustable between 15° and 41°

Flex bracket, long

- Specially for pipe welding
- Available in left- and right-handed design
- Freely adjustable between 20° and 41°

Fixed feed angle

- Easy adjustment
- Feed angle not adjustable
- Available with angles of 30°, 39° and 42°

Mini

- For very narrow operating points
- Suitable for cold wire only
- Optimum view of weld pool
- 35°

*You will find a detailed list of other equipment options in our spare parts catalogue.

TIG 260 CW/HW

- Highly compact design for working in confined spaces
- Optimum shielding gas coverage thanks to Multilayer gas diffuser
- 260 A/100% (DC)
- 185 A/100% (AC/DC)

TIG 450 CW/HW

- High duty cycles, ideal for long weld seams and continuous use
- Optimum shielding gas coverage thanks to Multilayer gas diffuser
- 400 A/100% (DC)
- 280 A/100% (AC/DC)

TIG-SR 18 CW/HW

- Consumables compatible with SR-18 welding torches
- 300 A/100% (DC)
- 210 A/100% (AC/DC)

comfyTig CW/HW

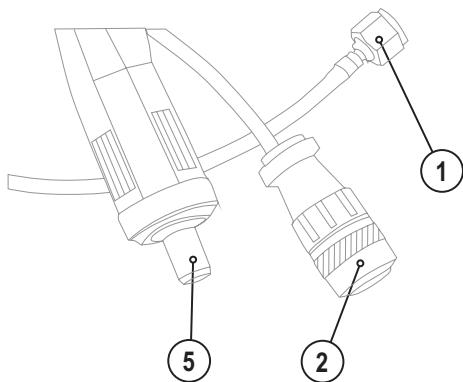

- TIG cold/hot wire torch in MIG/MAG grip
- Easy for welder to adapt to TIG welding after MIG/MAG welding
- Consumables compatible with SR-18 SC welding torches
- 300 A/100% (DC)
- 210 A/100% (AC/DC)

WP electrodes

- / Pure tungsten electrodes
- / AC welding of aluminium alloys
- / Not suitable for DC welding

WZ electrodes

- / Lower risk of contamination of weld thanks to addition of zirconium
- / Tungsten electrodes for AC welding of aluminium alloys
- / Only limited suitability for DC welding

WC electrodes

- / Very good ignition and reignition characteristics thanks to ceroxide
- / Suitable for DC and AC welding
- / Can be used for unalloyed and high-alloy steels and aluminium, titanium, nickel, copper and magnesium alloys in the lower and mid current range
- / Good substitute for WT electrodes

E3 electrode

- / Variable non-standardised composition
- / Suitable for DC and AC welding
- / Can be used for unalloyed and high-alloy steels and aluminium, titanium, nickel, copper and magnesium alloys in the lower and mid current range
- / Long service life and very durable
- / Good alternative to WT electrodes

WT electrodes

- / Slightly radioactive due to addition of thorium
- / Refrain from using due to increased health risks
- / Improved ignition characteristics and better current-carrying capacity compared to WP electrodes

WL electrodes

- / Increased ignitability thanks to lanthanum oxide
- / Suitable for DC and AC welding
- / Can be used for unalloyed and high-alloy steels; aluminium, titanium, nickel, copper and magnesium alloys; and for microplasma welding
- / Ideal for use in low current range
- / Good substitute for WT electrodes

WR electrodes

- / Variable non-standardised composition
- / Suitable for DC and AC welding
- / Can be used for unalloyed and high-alloy steels and aluminium, titanium, nickel, copper and magnesium alloys in the lower and mid current range
- / Long service life and very durable

Thoriated tungsten electrodes

- / **Quote from BGI 746:**
“Tungsten electrodes containing thorium oxide may only be used for urgent technical reasons, as stated in Section 6.2.3 of BGR 220. When using these, the guidelines of the German Radiation Protection Act must be observed at all times.”
- / **Thoriated tungsten electrodes have been removed from our product range.**

SR 17/18/26/300HD

- Replacement parts set for TIG welding torches, types SR 17/18/26 and TIG-SR 300 HD
- Comprises the following:
- 2 torch caps (short, long)
- 6 collets (2 x D = 1.6 mm, 2 x D = 2.4 mm and 2 x D = 3.2 mm)
- 3 collet casings (1 x D = 1.6 mm, 1 x D = 2.4 mm and 1 x D = 3.2 mm)
- 3 gas nozzles (1 x D = 8.0 mm, 1 x D = 11 mm and 1 x D = 12.5 mm/L = 47 mm)
- 2 insulators
- 6 tungsten electrodes (2 x D = 1.6 mm, 2 x D = 2.4 mm and 2 x D = 3.2 mm/L = 175 mm)

„Consumables TIG-SR 300 HD“ on page 303

- Very high duty cycle
- Compatible with SR replacement parts
- Double push-button
- 5-pole connection socket required on machine side
- In case an 8-pole welding machine is being used, the “ADAP 8-5 POL” adapter can be alternatively used
- Excellent HF safety

Duty cycle DC-	300 A / 35 %
Duty cycle AC	250 A / 35 %
Electrode Ø	1.6 mm - 4 mm
Torch connection	Decentral 35 mm ² (pin Ø 13 mm ²)
Control cable connection	Tuchel, 5-pole
Shielding gas supply	G 1/4" RH, crown nut
Approvals	CE sign

Equipment as delivered:

- Collet body: Ø 2.4 mm
- Gas nozzle: Ø 11 mm, size 7
- Tungsten electrode WCe 20 (grey): Ø 2.4 mm
- Back cap “long”

SR 9/20

- Replacement parts set for TIG welding torches, types SR 9/20
- Comprises the following:
- 3 torch caps (short, medium, long)
- 4 collets (2 x D = 1.6 mm and 2 x D = 2.4 mm)
- 2 collets (1 x D = 1.6 mm and 1 x D = 2.4 mm)
- 1 gas diffuser (D = 2.4 mm/L = 33 mm)
- 3 gas nozzles (1 x D = 8.0 mm, 1 x D = 9.5 mm and 1 x D = 11 mm)
- 1 insulator
- 4 tungsten electrodes (2 x D = 1.6 mm and 2 x 2.4 mm/L = 175 mm)

TIG-SR 18

- Double push-button
- Compatible with SR replacement parts
- Ergonomic GRIP handle for a secure hold and ergonomic use
- Excellent HF safety

Duty cycle DC-	320 A / 100 %
Duty cycle AC	230 A / 100 %
Electrode Ø	0.5 mm - 4 mm
Torch connection	Decentral 35 mm ² (pin Ø 13 mm ²)
Control cable connection	Tuchel, 5-pole
Approvals	CE sign

Equipment as delivered:

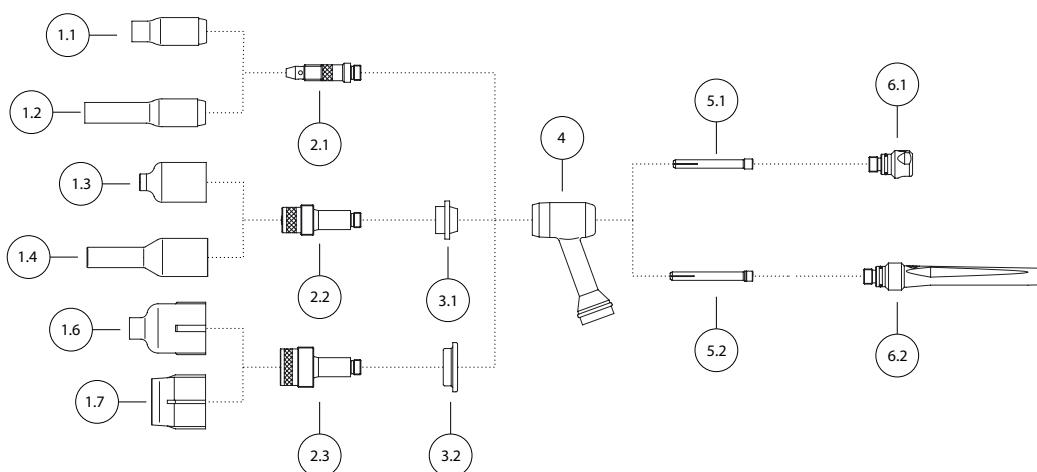

- Collet body: Ø 2.4 mm
- Gas nozzle: Ø 11 mm, size 7
- Tungsten electrode E3 (purple): Ø 2.4 mm
- Back cap "long"

TIG 260 CW/HW

[„Consumables TIG 260 CW/HW“ on page 340](#)

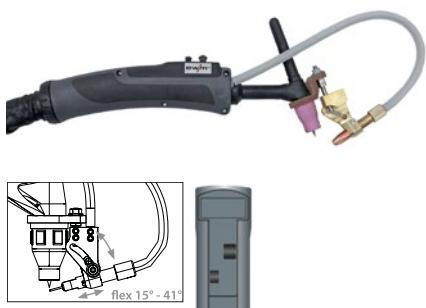

- Better accessibility in cramped spaces compared to common hot/cold wire torches thanks to compact construction
- Wire feeding quantity setting during welding
- Ergonomic GRIP handle for a secure hold and ergonomic use
- Replaceable steel/plastic liner
- Replaceable wire feed rotatable through 270°
- Excellent HF safety

Duty cycle DC-	260 A / 100 %
Duty cycle AC	185 A / 100 %
Electrode clamping range	1.6 mm - 3.2 mm

TIG welding torches - spotArc

spotArc

- Spot welding torch, with welding nozzles for fillet welds, edge welds and flat welds incl. setting gauge
- Better surface formation in comparison to resistance welding
- Flatter spot formation in comparison to MAG spot welding
- Excellent seam quality due to minimal heat input
- Very low thermal stresses and little distortion due to short welding times
- Perfect for visible joints due to clean seam appearance
- Robust design
- Excellent HF safety

Equipment as delivered:

- Collet body: Ø 2.4 mm
- One spot welding nozzle each for fillet, edge and flat weld

Filler wire codes TIG/plasma support

Determining item numbers for cold and hot wire feeds

An item code is required for ordering cold and hot wire supports, which forms the last five positions in the item number. This is formulated according to the configuration of the support.

Filler wire support code

Basic item number: 094-0020614-**ABCDD**

Position in item no.	Code	Designation	Matching connection
A	0	Cold wire	
	1	Hot wire	
B	0	T drive 4 Rob.2	Quick Connect L
	1	T drive 4 Rob.3	Quick Connect S
	2	Tetrix drive 4L/tigSpeed drive 45/tigSpeed drive 4 Rob	Dinse connector
C	0	Steel design	
	1	Stainless steel design	
	2	Aluminium design	
DD	10-40	Indication of the length	

Configuration examples:

Cold wire support, T drive 4 Rob.2, steel, 3 metres/092-020614-00030

Position in item no.	Code	Designation
A	0	Cold wire
B	0	T drive 4 Rob.2
C	0	Steel design
DD	30	3 metres
094-0020614- 0 0 0 30		End number

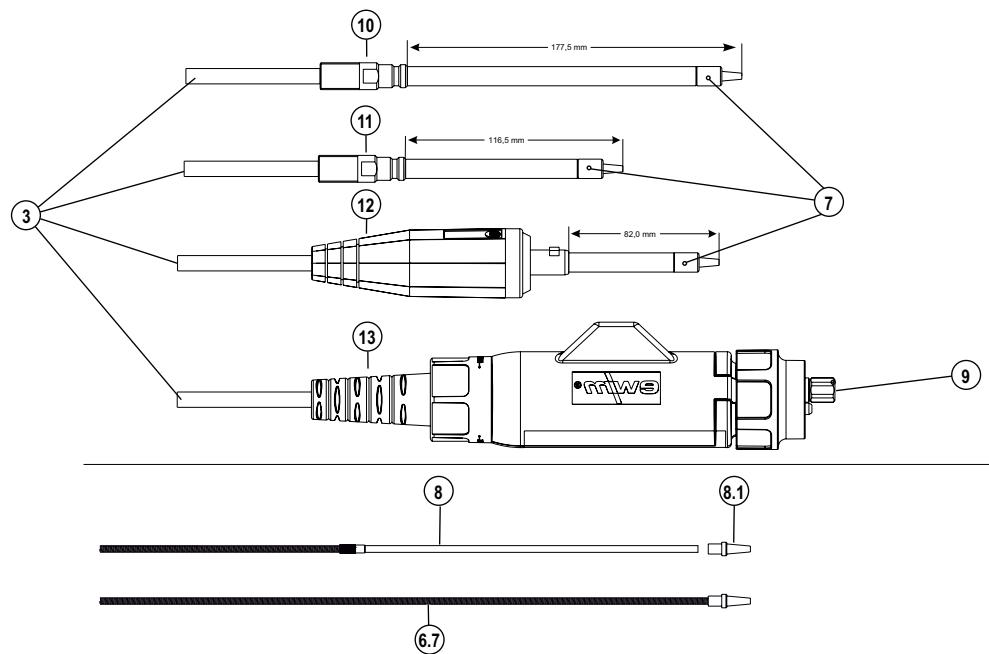

Hot wire support, T drive 4 Rob.3, stainless steel, 1.5 metres/092-020614-11115

Position in item no.	Code	Designation
A	1	Hot wire
B	1	T drive 4 Rob.3
C	1	Stainless steel design
DD	15	1.5 metres
094-020614 - 1 1 1 15		End number

Wire feed lengths currently available: 1.5 m, 3 m, 4 m = DD 15, 30, 40

- ▶ Other lengths available on request.
- ▶ Can be used in virtually all standard TIG automated welding torches.

Cold wire feeds

Wire feed for automated cold wire applications (TIG/plasma)

- Wire guide individually adjustable for each process
- Compatible with EWM cold wire support
- The wire feed can be shortened to the required length.

► Equipment parts, such as liners and inlet guides, are not part of the scope of delivery and must be ordered based on the specific application!

HW SUPPORT

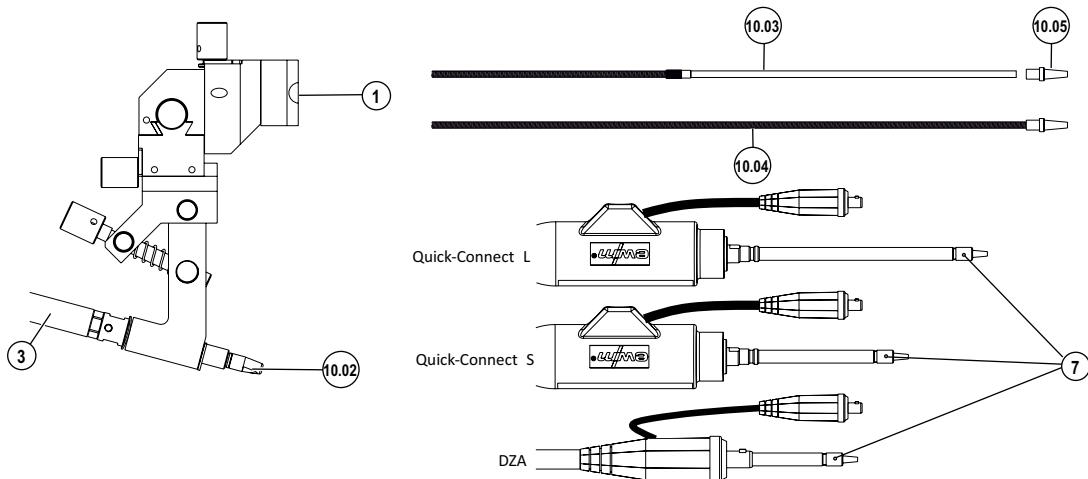

Wire feed for automated hot wire applications (TIG/plasma)

- XYZ axes and adjustment angle infinitely lockable and adjustable
- Insulated design (HF safe)
- Rapid, straightforward assembly
- May be used with virtually all common TIG automated welding torches.
- XYZ axes and adjustment angle infinitely lockable and adjustable
- Insulated design (HF-safe)
- Suitable for TIG-MT automated welding torches
- Clamping range from 18 mm to 35 mm
- Wire feed for automated hot wire applications (TIG/plasma)
- Adjustable on four axes:
 - Up/down
 - Forwards/backwards
 - Left/right
 - Angle

FURICK glass and ceramic gas nozzles

The large diameters of our gas nozzles guarantee a significantly better shielding gas coverage than conventional gas nozzles. This makes them ideal for use in processing high-alloy steels such as chromium-nickel steels or titanium.

Compatible with all SR-17/18/26 and SR-9/20 TIG welding torches from various manufacturers. We now offer three glass gas nozzles with various diameters as well as a ceramic gas nozzle.

Highlights

- Greatly improved shielding gas coverage (compared to standard nozzles)
- Optimum shielding gas coverage even when pipe welding thanks to different nozzle sizes. Equally suitable for both small and large pipe diameters.
- Allows discolouration to be reduced on the seam since the shielding gas remains above the seam section for longer*
- The high-grade components ensure great accuracy when the electrode is centred, leading to an increase in precision during welding.

Glass gas nozzles

- The glass design guarantees an optimum view while welding.
- The optional titanium ring increases sliding resistance during welding while protecting against damage.
- Three nozzle types are available:
 - **FUPA (nozzle Ø 19 mm):** High shielding gas coverage, even when working in confined spaces
Maximum load: 180 A, DC
 - **BBW (nozzle Ø 26.7 mm):** Maximum shielding gas coverage; can only be used to a limited extent in confined spaces, plug fitting
Maximum load: 200 A, DC
 - **BBWSG (nozzle Ø 26.7 mm):** Maximum shielding gas coverage; can only be used to a limited extent in confined spaces, screw fitting
Maximum load: 200 A, DC

The glass gas nozzles are **stacked** onto the welding torch along with the O-Ring.

The BBWSG is an exception to this: It is **screwed** onto the welding torch using a thread.

FURICK glass and ceramic gas nozzles

Ceramic gas nozzles

- The FUPA ceramic gas nozzle (nozzle Ø 19 mm) guarantees the same high shielding gas coverage as the FUPA glass gas nozzle.
- Resistant to damage and more favourable acquisition price compared to the FUPA glass gas nozzle.
- Maximum load: 200 A, DC

Ceramic gas nozzles are screwed onto the welding torch and do not require any additional o-rings:

FURICK glass and ceramic gas nozzles

Equipment tips

FUPA/BBW nozzles for SR 17/18/26/300 HD welding torches

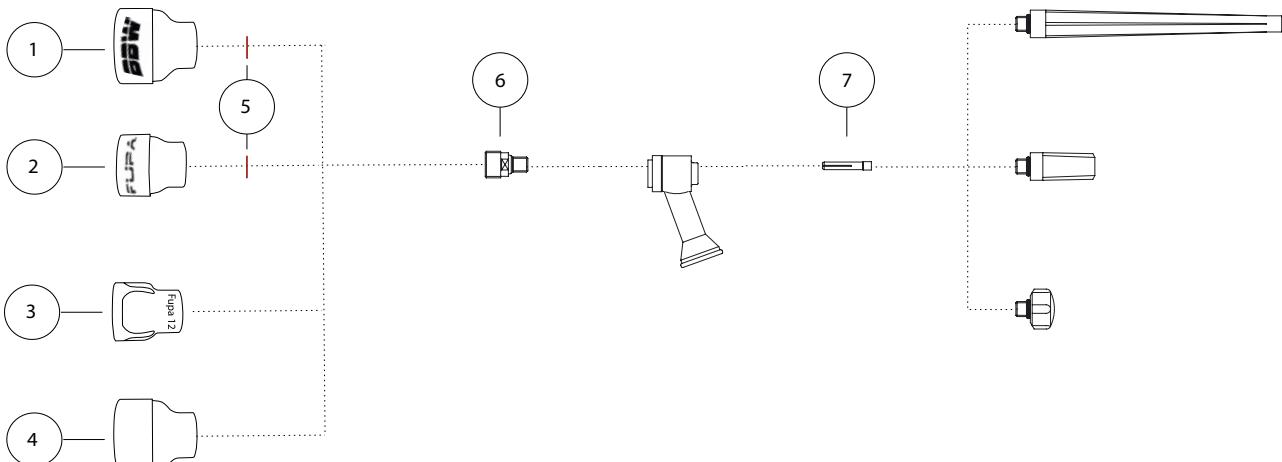

- The gas nozzles can only be operated with an electrode diameter of 2.4 mm.
- The gas nozzle holder set (094-023224-00000) is required for use on SR 17/18/26/300 HD welding torches.

Plasma welding torches - Plasma manual welding torch

PHW 20

PHW 20

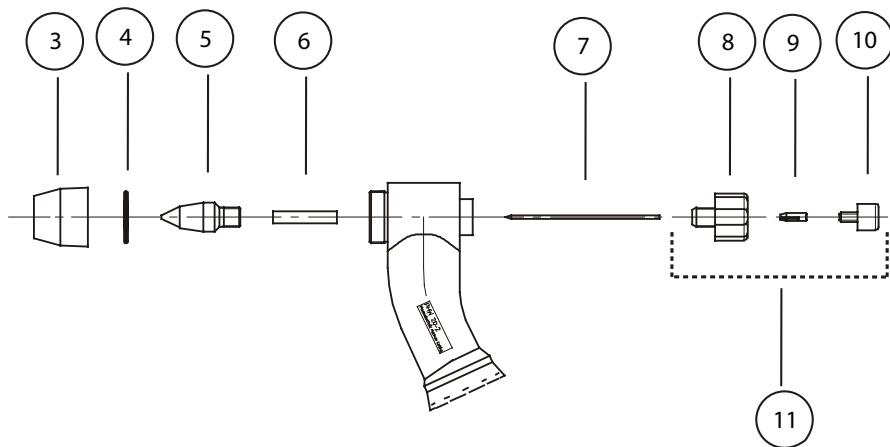

- Very small, water-cooled, powerful micro-plasma welding torch
- Suitable for Microplasma 25
- Plasma welding of foils, wires and filters made from high-alloy steels and nickel, copper and titanium alloys between 0.05 mm and 1 mm thick
- Conceived for precise welding of the finest wires and foils where the arc is extremely stable even with minimal welding currents
- **Consumables, dental:**
- For welding small wires for braces, inlays, dentures, etc.
- For small currents up to 15 A
- Projecting plasma nozzle
- Standard consumables are suitable for currents between 15 and 25 amperes
- Please always use an electrode setting gauge to achieve optimum welding results
- **Equipment as delivered:**
- Electrode: Ø 1.0 mm
- Plasma nozzle: Ø 1.0 mm
- Bakelite gas nozzle

Plasma welding torches - Plasma manual welding torch

PHW 100

- Equipment as delivered:
- Gas nozzle: Ø 13.5 mm
- Gas guide insert: Ø 1.5 mm
- Fine-pore gas lens
- Plasma nozzle Ø 1.4 mm
- Collet chuck Ø 1.5 mm
- Tungsten electrode, special Ø 1.5 mm

- Water-cooled plasma welding torch
- Greater load capacity of the plasma nozzles thanks to optimised cooling system
- Reduced operating costs, long service life of the plasma nozzles thanks to large, threadless retainer cone in the torch body and additional heat dissipation by means of the gas lens on the plasma nozzle
- Thanks to component miniaturisation: compact torch design and small torch head diameter for optimal handling with the greatest possible output
- With its extensive range of accessories, it's ideally suited to all common applications and the majority of special applications
- Please always use an electrode setting gauge to achieve optimum welding results

Plasma welding torches - Plasma automated welding torch

PMW 20

PMW 20

- Very small, water-cooled, powerful plasma machine welding torch
- Suitable for Microplasma 25
- Plasma welding of foils, wires and filters made from high-alloy steels and nickel, copper and titanium alloys between 0.05 mm and 1 mm thick
- Conceived for precise welding of the finest wires and foils where the arc is extremely stable even with minimal welding currents
- **Equipment as delivered:**
- Electrode: Ø 1.0 mm
- Plasma nozzle: Ø 1.0 mm
- Bakelite gas nozzle
- Consumables, dental:
- For welding small wires for braces, inlays, dentures, etc.
- For small currents up to 15 A
- Projecting plasma nozzle
- Standard consumables are suitable for currents between 15 and 25 amperes
- Please always use an electrode setting gauge to achieve optimum welding results

Duty cycle DC- 25 A / 100 %

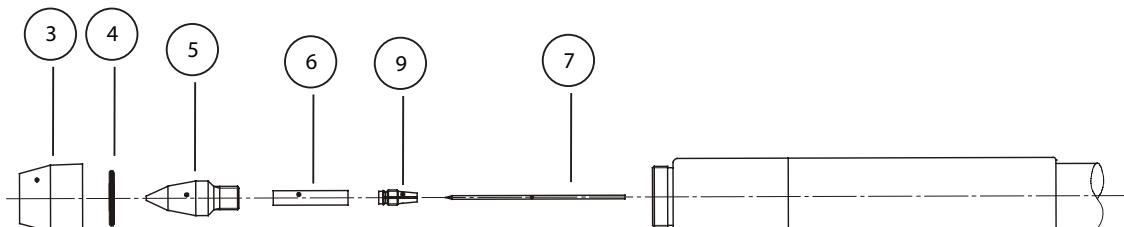

Connection Tuchel, 5-pole

Nozzle Ø 0.5 mm - 1.2 mm
